OBJECTIVE

A motivated MCA student and Computer Applications graduate seeking an entry-level Data Analyst or Machine Learning role to utilize my technical skills, learn emerging technologies, and contribute to innovative, data-driven projects.

EDUCATION

Master of Computer Applications (MCA) , PB Siddhartha College of Arts and Science (Pursuing) CGPA: —	Expected 2027
Bachelor of Computer Applications (BCA) , Aditya Degree College CGPA: 8.2/10	2022 - 2025

SKILLS

Programming Languages	Python, SQL, Java, JavaScript, HTML, CSS
Data Science & ML	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow (Basics)
Data Analytics & BI	Data Cleaning / ETL, Statistical Analysis, Data Visualization, Power BI (Basics)
Developer Tools	Git, GitHub, VS Code, Jupyter Notebook
Databases	MySQL, PostgreSQL, Database Design
Certifications	DevOps Essentials & DevOps Basics for Everyone – edX Introduction to Cloud Computing – edX Tata Data Visualisation – Forage Job Simulation

EXPERIENCE

MACHINE LEARNING INTERN ULEARN	MAY 2024 to JULY 2024 Visakhapatnam
- Built and evaluated 3+ supervised and unsupervised machine learning models using Python and Scikit-learn. - Performed end-to-end data analysis and visualization on datasets of 5,000+ records using Pandas, NumPy, and Matplotlib. - Optimized data preprocessing pipelines, reducing data cleaning time through automated feature engineering scripts. - Collaborated with a 4-member cross-functional team in an agile environment and contributed to project delivery.	

PROJECTS

- Data Analytics & Visualization Dashboard:** Developed an interactive dashboard analyzing 10,000+ records to identify sales trends using Python, Pandas, Matplotlib, and NumPy.
- Machine Learning Prediction System:** Engineered a predictive model achieving 85%+ accuracy using Scikit-learn, feature engineering, cross-validation, and hyperparameter tuning.
- Full-Stack Web Application:** Built a responsive web application using JavaScript, HTML, CSS, Node.js, RESTful APIs, and SQL.

EXTRA-CURRICULAR ACTIVITIES

- Regularly practice chess, Sudoku, jigsaw puzzles, and crosswords to strengthen analytical and problem-solving skills.
- Attend technical workshops, webinars, seminars, and online learning programs.
- Develop academic and personal projects to strengthen practical skills in programming, data analytics, and machine learning.

LEADERSHIP

- Analytical Thinking – Ability to analyze data, identify patterns, and make informed decisions.
- Problem Solving – Strong interest in solving technical and logical challenges systematically.
- Collaboration – Experience working with team members during internship and project activities.
- Discipline and Commitment – Maintained consistency, focus, and dedication while learning new technologies and completing projects.
